

Earlier integer unit ball
 $|a_1| + |a_2| \leq 1$

Later all-subset module
 $P(a) \leq 1, N(a) \leq 1$

Exceptional divisor product
 $\lambda = \mu = \sqrt{2}, \quad \lambda\mu = 2$

The retained maps

$$(q, p)(x, \ell) = (x, \ell)$$

$$q^{-1}(0) = L$$

$$z_\ell : (x, \mu) \mapsto (0, \ell \wedge \mu)$$

$$z_\ell \circ z_\mu = z_{\ell \wedge \mu}$$

Top: integer amplitudes.
 Shading: exact real regions.
 Below: rational amplitudes;
 dashed boundary excluded.
